

Certificate of Participation

is awarded to

Konstantinos Fokeas

for submitting a valid Jupyter notebook
in the WEkEO Jupyter Notebook Competition 2022

This competition is funded by the Copernicus Programme and is developed as a joint project with EUMETSAT, ECMWF, Mercator Ocean International and the EEA. The aim of the competition is to build an open source-resource library that will expand big data analytics literacy in Earth observation and data science.

We hereby certify that the participant has submitted a Jupyter notebook that fulfils the minimum requirements to be considered for evaluation. Through this submission, the participant has contributed to the creation of a community-driven resource of notebooks that will empower others to start their own journeys with Earth observation data.
