

Persistance across chunks with R and Python

Lets define x in R

```
# running R
x <- 1
```

Does R remember?

```
# running R
x
```

```
## [1] 1
```

yes it does!

```
# running python
y = 1
```

Does python remember?

```
# running python
try:
    print(y)
except:
    print("I do not remember 'y'")

## I do not remember 'y'
```

```
sessionInfo()
```

```
## R version 3.4.2 (2017-09-28)
